Projects

Musiquality	Interest Calculator
Allows you to search for new music based on artists you already like. Built on Angular and Ionic.	Originally built to calculate my student loan interest, I later adjusted it so it can be used by anyone.

Attack From Above	Writer Website
Mobile game which features a bird pooping on cars. Built with Unity3d and Javascript. Available on Google Play.	My first website, which serves as a showcase for my writing. Samples of my writing can be viewed here.

Golf Score Card App	No Sleep Games
Search your course and track your score. Utilizes Google Maps. Built with the Swing by Swing API.	As a Co-Founder, it was necessary to become adaptable and learn a variety of business skills.

Education

Certificate Web Programming/Development, MATC   Mar 2015- Present

Associates Web Development, Baker Online College   Jan 2013- Mar 2015

Work Experience

Teaching Assistant, Mountainland Applied Tech College   Mar 2015- Present
- Created curriculum for front end skill development and assisted other professors in their classes.
- Conducted daily computer lab to help students with programming questions.
- Oversaw administration needs of the classroom.

Co-Founder, No Sleep Games   Feb 2014- Feb 2015
- Started a video game company focused on storytelling and addictive gameplay.
- Took the responsibilities of lead writer, sole programmer, and many other duties.
- Conceptualized and managed the development of our first game: 'Attack From Above.'

Assistant Manger, Fewkes & Son Machine Co.   Nov2012- Jan 2014
- Organized and planned job orders.
- Supervised pickups, deliveries, and prepared projects for welding.
- Learned how to effectively manage my own projects and reach deadlines while maintaining quality.
